EDUCATION

Bachelor of Science Information Technology

KING MONGKUT'S UNIVERSITY OF TECHNOLOGY THONBURI (KMUTT) 2022 - 2026

- SIT Photoclub Member
- Staff in KMUTT Startup Playground 2024
- Staff in IT#29 and IT#30 Starterpack Camp
- Staff in SIT Helloworld Goose

TECHNICAL SKILLS

- Languages:**
 - Go, Java, SQL, Dart, JavaScript, Python
- Backend Development:**
 - Go Fiber v3, Java Spring Boot, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture, GORM, JPA/Hibernate
- Frontend Development:**
 - Vue.js 3 (Composition API), Flutter, Riverpod, Pinia, Vite
- Database & System Design:**
 - MySQL, ERD Design, 3NF Normalization, Query Optimization, Indexing
- Infrastructure & Dev Tools:**
 - Linux VM Deployment, HTTPS/TLS Configuration, Docker (Basic), Git, GitHub, Postman
- System Integration & Additional Technologies:**
 - Socket.io, PaddleOCR (Python Microservice), Vue-ECharts, Tiptap, Quill

SOFT SKILLS

- Critical Thinking
- Adaptability
- Collaboration
- Teamwork
- Communication
- System Thinking
- Curiosity
- Problem Solving
- Detail-oriented

PROFILE

Junior Backend-focused Full Stack Developer with hands-on experience building RESTful APIs, authentication systems, and relational database schemas using Go Fiber, Java Spring Boot, GORM, MySQL, and PostgreSQL. Strong in backend architecture, database design, API integration, and developing maintainable systems that support real user workflows.

EXPERIENCE

Software Engineer Intern Jan 2025 - July 2025
Stream I.T. Consulting Ltd. | Bangkok, Thailand

Project: ONE PLATFORM (Enterprise ERP System)

Contributed to the development of a company-wide **ERP platform** supporting end-to-end project lifecycle management from sales initiation to executive approval across all organizational levels.

- Developed and integrated frontend modules for enterprise **ERP systems**, working closely with backend APIs and authorization rules
- Implemented role-based access control (**CASL**) to manage permissions across organizational hierarchy
- Engineered real-time approval notifications using **Socket.io** and built executive dashboards with **Vue-ECharts**
- Integrated document workflows including digital signatures and rich text editors (**Tiptap**)

PROJECTS

ChangSure (Senior Capstone Project) | Go, Flutter, MySQL, OCR Oct 2025 - May 2026

Full-Stack Developer

- Designed a normalized MySQL database schema with 32 tables for booking, payment, chat, notification, badge, and criminal-check workflows.
- Developed RESTful APIs using Go Fiber v3, GORM, and layered backend architecture.
- Implemented booking status transitions from PENDING to COMPLETED.
- Integrated Redis, MinIO, WebSocket, and PaddleOCR microservice to support real-time workflows, file storage, and OCR-based document processing.
- Deployed backend services on a Linux VM with HTTPS/TLS configuration.
- Project Showcase**
- GitHub Repository**

Kradan Kanban (Integrated Project) | Java Spring Boot, MySQL Apr 2024 - Dec 2024

Backend Developer

- Architected secure RESTful APIs for a task management system using **Java Spring Boot (MVC Architecture)** and **JWT Authentication**.
- Implemented comprehensive CRUD operations with strict data validation, error handling, and transaction management.
- Designed a relational database schema and optimized **SQL queries** for efficient data retrieval.
- GitHub Repository**

DATALIC - Database Management Project | MySQL, SQL Jan 2024 - Feb 2024

Database Designer

- Designed a comprehensive 3NF normalized database schema for an entertainment venue management system based on complex business requirements.
- Constructed advanced SQL queries using joins, aggregations, and subqueries to generate revenue reports and operational analytics.

LANDEKLEN (CLIENT SIDE WEB PROGRAMMING II PROJECT) Mar 2024 - Apr 2024

Frontend Developer

- Enhanced user experience by improving username input, implementing local storage for user data
- adding a countdown feature before game start in the Client-side Web Programming II course
- link project**
